

Coalition to Support Florida Public Education

Our Mission: Educate voters on the importance of keeping schools under local control, letting communities elect their own school boards, and not being tempted by redundancy in teaching.

The LWVFL and other concerned organizations formed the Coalition after the Florida Constitution Revision Commission placed Amendment 8 on the November ballot. Amendment 8 links three otherwise unrelated education proposals and then attempts to hide radical policy behind term limits, which polls well. The overall impact of this deceptive amendment would significantly impact local control of our public schools.

The Coalition's goal is to engage and educate voters on the true impact of Amendment 8. Don't Take the Bait!
